

**INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY, APRIL 5, 2006 – 0800 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light nationally with 123 new fires reported. Three new large fires were reported, and two large fires were contained in the Southern Area. Very high to extreme fire indices were reported in Delaware, Illinois, and Indiana.

SOUTHERN AREA INCIDENTS/LARGE FIRES:

WEST TEXAS IA, Texas Forest Service. A Texas State Type 2 Incident Management Team (Hanneman) is assigned in Midland, TX. The Team is assisting local jurisdictions with managing initial and extended attack fires and a fire prevention program within the 140 million acre fire management response area. One new fire in Terrell County was reported. Acres, structure losses and costs represent cumulative fire activity for the response area.

LONE STAR, Talihina Agency, Bureau of Indian Affairs. This fire is six miles northeast of Coalgate, OK in timber and grass. The fire is being patrolled and monitored.

HAPPY HOLLOW, Arkansas Forestry Commission. This fire is four miles southeast of Timbo, AR in timber. No new information was reported.

OUTLOOK:

Red Flag Warnings: Northeast New Mexico, Eastern Colorado Foothills and Plains for strong winds and low humidity.

Fire Weather Watches: Southeast New Mexico and parts of adjacent western Texas for strong winds and low humidity.

Weather Discussion: A surface low pressure system will create strong winds in combination with dry conditions for much of the Southwest, southeast Colorado, western Oklahoma, and southwestern Kansas. A large high pressure center will create dry conditions for the Southeast extending into the Mid-Atlantic states.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<p>Eastern Area Partly cloudy and breezy across the Great Lakes and Big Rivers. Mostly cloudy with increasing chance of showers and thunderstorms over the Mid-Atlantic and southern New England. Partly cloudy across Maine, New Hampshire, and Vermont.</p>	<p>55 to 65 across the Big Rivers and southern Great Lakes. 50 to 60 over the Mid-Atlantic and southern Northeast states.</p>	<p>26 to 36% across Maine, New Hampshire, and Vermont. 35 to 50% over the remainder of the Northeast and Mid-Atlantic states.</p> <p>30 to 40% over the southern Great Lakes and Big Rivers.</p>	<p>North to northwest winds at 10 to 20 mph with higher gusts across the Big Rivers and Great Lakes, diminishing from west to east later in the day.</p> <p>Southeast at 10 to 16 mph becoming southwest across New England, New Jersey, Delaware, Maryland, and eastern Pennsylvania.</p> <p>West to southwest at 10 to 20 mph becoming northwest at 15 to 30 mph across Ohio, western Pennsylvania, and West Virginia.</p>
<p>Rocky Mountain Area Partly Cloudy and becoming windy.</p>	<p>65 to 75.</p>	<p>10% to 20%, eastern Colorado</p>	<p>Southwest Winds 20 to 30 mph with gust 40 to 50 mph.</p>
<p>Southwest Area Windy area-wide, with warm and dry conditions across eastern New Mexico and into west Texas. A chance for rain and higher elevation snow showers across northern Arizona and northwest New Mexico. Isolated thunderstorms west Texas.</p>	<p>60s to upper 80s lower elevations. 30s to 50s across the higher elevations of the Southwest Area.</p>	<p>8% to 20% across the lower elevations of southeast Arizona, New Mexico and parts of west Texas. 20 to 40%+ across the mountains and remainder of the Southwest Area.</p>	<p>South to southwest 20 to 40 mph across eastern Arizona, New Mexico and northwest Texas. South to southwest 10 to 20 mph across the remainder of the Southwest Area.</p>
<p>Southern California Showers. Snow level 5000 feet.</p>	<p>35 to 50 mountains. 50 to 62 valleys. 55 to 60 upper deserts. 65 to 75 lower deserts.</p>	<p>50 to 70%.</p>	<p>Southwest to northwest 12 to 25 mph with higher gusts.</p>
<p>Southern Area No information Reported.</p>

AVIATION MISHAP RESPONSE ACTIONS

Having a written mishap response action posted and accessible to all employees is an important first step. Having a list of actions to follow will ensure that nothing is missed in a stressful, time-critical period.

Immediate, positive action is necessary. Any delay may affect someone's chances of survival.

Conduct rescue operations keeping the following priorities in mind:

- Preserve life.
- Do whatever is necessary to extricate injured occupants and to extinguish fires, keeping in mind the necessity of protecting and preserving evidence.
- Document and/or photograph the location of any debris that must be disturbed in order to carry out rescues and/or fire suppression activities.
- Secure the area. Treat the crash site as a crime scene. Arrange for security at the accident scene if necessary. Determine if hazardous materials were on the aircraft. Deny access except to credentialed officials and escorted media.

Be aware that crash sites can be dangerous due to hazardous cargo, flammable and toxic fluids, sharp objects, disease, adverse terrain, hot/cold weather conditions, and fire.

Exercise good judgment, utilize available protective devices and clothing, and use extreme caution when working near the wreckage site.

Do not exceed your physical limitations.
